Power listed is conducted. SAR compliance for body-worn operations is restricted to belt-clips, holsters, or similar accessories that have no metallic component in the assembly and which provide at least 1.5 cm separation between the device and the users body. SAR compliance for specific co-located transmitter conditions was evaluated for near-body and held-to-ear operating configurations as described in this composite filing; other co-located configurations require separate evaluation. End-users must be informed of the body-worn operating requirements for satisfying RF exposure compliance. The highest reported co-located SAR levels are: Part 15.247: Body: 0.01 W/kg, Head: 0.02 W/kg.
